TECHNICAL BULLETIN — February 2015

**387. Huss Enterprise/UFO central hub and boom cracking**

Huss has issued a service bulletin detailing a crack found at the central hub of one of its Enterprise devices. The bulletin recommends that a qualified inspector assess the area depicted for any defects.

*The information contained within is that of the manufacturer and not NAFLIC. When following the advice from the manufacturer, you are reminded of your duties and responsibilities under HSG175 regarding modifications.*

To whom it may concern:

Our records indicate that you are the owner/operator of an Enterprise/UFO amusement ride manufactured by Huss. If you are no longer in possession of this ride please return this letter with the contact data of the new owner to Huss Parts & Service GmbH.

During a general overhaul of an Enterprise ride, cracks in the area of the boom head have been detected.

A related picture and a drawing are attached to this letter.

It is strongly recommended to get this area inspected by a certified company.

Do not hesitate to get in touch with us in case of any questions or concerns.

Kind regards

A handwritten signature in blue ink, appearing to read "A. Warnecke", written over a horizontal line.
