SERVICE BULLETIN 96-1

STAR DANCER

This bulletin is issued to Star Dancer, Serial #94PASD10001 ONLY.

This ride was originally designed and built with a load cell system and a computerized levelling system. Neither of these systems are required for safe operation as deemed by us, the designers and manufacturer of this ride. All future Star Dancers will not be equipped with these systems.

If you, as an inspector, have any questions regarding the above mentioned system, please contact the factory. This bulletin is to remain with the ride and the owners of this ride. This is the only ride this bulletin applies to so it will not be sent out to every inspector in every state.
